PROJECTS

- Worked on the software part of a Melting Point apparatus being developed under Entrepreneurship Promotion & Incubation Council (EPIC). A cheaper alternative of the Melting Point apparatus already present in the market. (December 2019 - January 2020)
- Developed a note storing application for android devices. GitHub link: <https://github.com/utsbansal/MyNotes-Application>. An application which can store user's notes. The user can write new notes, read previous notes, and delete the unwanted ones. The application was made to learn different functionalities provided by the Android Studio for the development of applications. (November 2019)
- Documented the working of APIs using Swagger Inspector. A project taken up to understand the basics of APIs. This was done by writing a blueprint of an API on the Swagger Hub. (August 2019)
